

ABSTRACT

Computer login may comprise any user-determined submission. Account identification may be inferred by signature rather than explicitly stated. A plurality of discontiguous data blocks in a plurality of files may be employed for validation. The paths to data used in validation may be multifarious, regardless of the prospects for successful authorization.

RELATED U.S. APPLICATION DATA

This application has the identical disclosure to provisional application 60/286,457 filed on April 26, 2001.
